SECTION 4: First aid measures

- · 4.1 Description of first aid measures
- · General information
- Involve doctor immediately.

Immediately remove any clothing soiled by the product.

· After inhalation

In case of unconsciousness place patient stably in side position for transportation. Supply fresh air; consult doctor in case of complaints.

- · After skin contact Immediately wash with water and soap and rinse thoroughly.
- · After eye contact Rinse opened eye for several minutes under running water. Then consult a doctor.
- After swallowing

Rinse out mouth and then drink plenty of water.

Do not induce vomiting; call for medical help immediately.

Drink plenty of water and provide fresh air. Call for a doctor immediately.

\cdot 4.2 Most important symptoms and effects, both acute and delayed <code>Corneal damage</code>

• **4.3 Indication of any immediate medical attention and special treatment needed** No further relevant information available.

SECTION 5: Firefighting measures

- · 5.1 Extinguishing media
- Suitable extinguishing agents

CO2, powder or water spray. Fight larger fires with water spray or alcohol resistant foam.

(Contd. on page 4)

according to 1907/2006/EC, Article 31

Printing date 27.03.2020

- · For safety reasons unsuitable extinguishing agents Water with full jet.
- · 5.2 Special hazards arising from the substance or mixture No further relevant information available.
- · 5.3 Advice for firefighters
- · Protective equipment: Wear fully protective suit.
- · Additional information

Collect contaminated fire fighting water separately. It must not enter the sewage system.

SECTION 6: Accidental release measures

- 6.1 Personal precautions, protective equipment and emergency procedures Wear protective equipment. Keep unprotected persons away.
- 6.2 Environmental precautions: Dilute with plenty of water. Do not allow to enter sewers/ surface or ground water. Do not allow to penetrate the ground/soil.
- 6.3 Methods and material for containment and cleaning up: Absorb with liquid-binding material (sand, diatomite, acid binders, universal binders). Use neutralising agent. Dispose contaminated material as waste according to item 13. Ensure adequate ventilation.
- 6.4 Reference to other sections
 See Section 7 for information on safe handling
 See Section 8 for information on personal protection equipment.
 See Section 13 for disposal information.

SECTION 7: Handling and storage

- **7.1 Precautions for safe handling** Ensure good ventilation/exhaustion at the workplace. Prevent formation of aerosols. Avoid contact with eyes and skin.
- · Information about fire and explosion protection: No special measures required.
- · 7.2 Conditions for safe storage, including any incompatibilities
- · Storage
- · Requirements to be met by storerooms and receptacles: Store only in the original receptacle.
- · Information about storage in one common storage facility:
- Do not store together with acids.
- Keep away from food, beverages and feed.
- \cdot Further information about storage conditions: Keep receptacle tightly sealed.

· 8.2 Exposure controls

· Personal protective equipment

General protective and hygienic measures
 Keep away from foodstuffs, beverages and feed.
 Immediately remove all soiled and contaminated clothing
 Wash hands before breaks and at the end of work.
 Do not inhale gases / fumes / aerosols.
 Avoid contact with the eyes and skin.

· Respiratory protection:

Filter A/P2.

In case of brief exposure or low pollution use respiratory filter device. In case of intensive or longer exposure use self-contained respiratory protective device. Not necessary if room is well-ventilated.

Not necessary in room is wen-venu

· Protection of hands:

Protective gloves.

- · Material of gloves Butyl rubber, BR
- · Penetration time of glove material

The exact break trough time has to be found out by the manufacturer of the protective gloves and has to be observed.

- For the permanent contact gloves made of the following materials are suitable: * butyl rubber 0,7 mm, 480 min (EN 374)
- For the permanent contact of a maximum of 15 minutes gloves made of the following materials are suitable:
- Nitrile rubber, NBR Eye protection:

Tightly sealed goggles (EN 166)

· Body protection:

Apron Boots

SECTION 9: Physical and chemical properties

- \cdot 9.1 Information on basic physical and chemical properties
- General Information
- · Appearance:

Form:	Fluid
Colour:	Light yellow
· Odour:	flowery
 Odour threshold: 	Not determined.

(Contd. of page 7)

 10.2 Chemical stability
 Thermal decomposition / conditions to be avoided: No decomposition if used according to specifications.

to: 10.3 Possibility of hazardous reactions Corrosive action on metals Reacts with strong acids Strong exothermic reaction with acids Reacts with light alloys to form hydrogen Corrodes aluminium

· 10.4 Conditions to avoid No further relevant information available.

· 10.5 Incompatible materials: Not compatible with alkali-sensitive substances like Sn, Zn, Al and paintings.

• 10.6 Hazardous decomposition products: No dangerous decomposition products known

SECTION 11: Toxicological information

· 11.1 Information on toxicological effects

• Acute toxicity Based on available data, the classification criteria are not met.

· ····· · · · · · · · · · · · · · · ·				
· LD/LC50	· LD/LC50 values relevant for classification:			
112-34-5 2	112-34-5 2-(2-butoxyethoxy)ethanol			
Dermal	LD50	2,700 mg/kg (can)		
Inhalative	LC50	3,384 mg/kg (Rat)		
111-76-2 2	2-buto	xyethanol		
Oral	LD50	1,746 mg/kg (Rat)		
Inhalative	LCLo	>3.1 ppm (consumer)		
31726-34-	31726-34-8 hexane-1-ol, ethoxylated (polymer)			
Oral	LD50	>300-2,000 mg/kg (Rat)		
· Primary ir	· Primary irritant effect:			
 Skin corre 	- Skin corrosion/irritation			
Causes se	vere s	kin burns and eye damage.		
· Serious eye damage/irritation				
Causes serious eye damage.				
· Respiratory or skin sensitisation Based on available data, the classification criteria are not met.				
CMR effects (carcinogenity, mutagenicity and toxicity for reproduction)				
· Germ cell	· Germ cell mutagenicity Based on available data, the classification criteria are not met.			

- Germ cell mutagenicity Based on available data, the classification criteria are not met.
- Carcinogenicity Based on available data, the classification criteria are not met.
- Reproductive toxicity Based on available data, the classification criteria are not met.
- **STOT-single exposure** Based on available data, the classification criteria are not met. • **STOT-repeated exposure** Based on available data, the classification criteria are not met.
- Aspiration hazard Based on available data, the classification criteria are not met.

EC50/48 h	76 mg/l (Daphnia magna)				
EC50/15 min	22 mg/l (Photobacterium phosphoreum)				

• **12.2 Persistence and degradability** No further relevant information available.

• Other information: The product is biodegradable.

· 12.3 Bioaccumulative potential No further relevant information available.

· 12.4 Mobility in soil No further relevant information available.

• Additional ecological information:

· COD-value: 468000 mg/l

· General notes:

The product does not contain organically bounded halogens (AOX-free).

The surfactant(s) contained in this preparation complies(comply) with the biodegradability criteria as laid down in Regulation (EC) No.648/2004 on detergents. Data to support this assertion are held at the disposal of the competent authorities of the Member States and will be made available to them, at their direct request or at the request of a detergent manufacturer.

The contained organic complexing agents reach a DOC-elimination grade of 80% (corresponding to No. 406 of Annex "Analytic and measuring methods") and with this meet the tightened demands of Annex 49 of the revised Direction on liqid waste.

Do not allow undiluted product or large quantities of it to reach ground water, water course or sewage system.

Must not reach sewage water or drainage ditch undiluted or unneutralised.

Rinse off of bigger amounts into drains or the aquatic environment may lead to increased pH-values. A high pH-value harms aquatic organisms. In the dilution of the use-level the pH-value is considerably reduced, so that after the use of the product the aqueous waste, emptied into drains, is only low water-dangerous.

according to 1907/2006/EC, Article 31

Printing date 27.03.2020

Version number 6

· 12.5 Results of PBT and vPvB assessment

· PBT: Not applicable.

· vPvB: Not applicable.

· 12.6 Other adverse effects No further relevant information available.

SECTION 13: Disposal considerations

· 13.1 Waste treatment methods

· Recommendation

Must not be disposed together with household garbage. Do not allow product to reach sewage system. Must be specially treated adhering to official regulations.

· European waste catalogue

20 01 29* detergents containing hazardous substances

· Uncleaned packaging:

· Recommendation:

Packagings that may not be cleansed are to be disposed of in the same manner as the product.

Non contaminated packagings may be recycled.

• Recommended cleansing agents: Water, if necessary together with cleaning agents.
