Operating instructions

This high pressure washer has been designed for professional use typically in following cleaning applications:
Agriculture, industry, transport industry, automotive cleaning, municipal facilities, cleaning trade, construction industry, food industry etc.

The pictorial quick reference guide

The pictorial quick reference guide is designed for helping you when starting up, operating and storing the unit. The guide is subdivided into 8 sections.

A

Before starting

DO READ SAFETY INSTRUCTIONS BEFORE USE!

Operating elements:

- A1. Top cover release
- A2. Receptacle for service crane and lifting ring¹⁾
- A3. Hot chimney
- A4. Cable hook
- A5. High pressure hose reel lock¹⁾
- A6. Spray lance
- A7. Supply water connection
- A8. Water inlet filter¹⁾
- A9. Tunable cable hook
- A10. Parking brake
- A11. Tool box
- A12. Control panel
- A13. High pressure hose connection on machine B4.a/B4.b¹⁾
- A14. High pressure hose reel¹⁾
- A15. Crank handle for High pressure hose reel¹⁾
- A16. Place for canister for detergent
- A17. Footboard for tipping product
- A18. Tank filler for Nilfisk AntiStone
- A19. High pressure hose hook
- A20. Side door release
- A21. Safety warning label
- A22. Tank filler for fuel
- A23. Spray Gun holder
- A24. Flow regulation knob¹⁾
- A25. Fuel level view
- A26. Long detergent hose for external canister
- A27. Service interval due/expired LED
- A28. Nilfisk AntiStone low¹⁾ LED
- A29. Fuel low¹⁾ LED
- A30. Pump oil low¹⁾ LED
- A31. Power ON LED
- A32. Pressure gauge¹⁾
- A33. Boiler overheated indication LED
- A34. No flame indication LED
- A35. ECO-mode indication LED
- A36. Hour counter; Set temp. reading; Error codes¹⁾
- A37. Fahrenheit /Celsius indicator¹⁾
- A38. Main switch with hot/cold water selection
- A39. Temperature control knob
- A40. Detergent metering knob¹⁾

B

Unpacking and preparing the unit

- B1. Remove safety traps from the cleaner.
- B2. Remove the hose, lance and cable from the pallet.
- B3. If wanted the hose reel can be changed from right hand operation to left hand operation¹⁾.

- B4.a Machines with hose reel: Remove transportation caps from inlet and outlet. Connect the high pressure hose and roll it up on the hose reel and lock hose reel on handle (A)^{1).}
- B4.b Machines without hose reel: Remove transportation caps from inlet and outlet. Connect the high pressure hose and place it on the hook (B).
- B5. Place power cord around cable hooks (A and B) and lock the cable end at cable hook (B).
- B6. The Nilfisk Antiscale device is set at the factory to a water hardness of Slightly Hard. See table at maintenance section. Warning indication cancelled when set to "0".
- B7. Release the wheel brake.
- B8. Lift in the handle and pull the cleaner's rear wheel of the pallet and down to the floor.
- B9. For easy tilting and maneuvering - kick the footboard and push down on handle.

C

Lifting and strapping for transport

- C1.a The safest way to lift the cleaner is to use a fork-lift truck from the front or back end of the cleaner. (Not from side!).
- C1.b Use the fixing points (A,B,C) when lifting with belts. Do not lift in or strap to the plastic parts of machine as it could become detached from the frame.
- C1.c For safe daily lifting the Nilfisk accessory lifting set (#107140912 + #301001090) is recommended.
- C2. Use the fixing points (A,B,C) when securing with belts for transportation. Do not lift in or strap to the plastic parts of machine as it could become detached from the frame.

D

Setting up the unit:

If your location is higher than 500 m (1625 ft) above sea level, your burner may require re-adjustment for proper performance and best fuel economy - Contact Nilfisk Service for assistance! For location higher than 1000-2500 m might require an optional burner kit - Contact Nilfisk Service for assistance!

Before using the cleaner for the first time, check it carefully to detect any faults or damage. Run the machine only when it is in perfect condition.

- D1. The slope on which the high pressure cleaner is placed must not exceed more than 10° in any direction.
OBS: ambient temperature should be above 0°C and not higher than 40°C. Machine temperature must not be below 0°C.
- D2. Set the brake.
- D3. Fill up detergent tank^{1).}
- D4. Fill up tank for Nilfisk AntiStone^{1).}
- D5. Fill fuel tank with fresh fuel, heating oil, DIN 51603-1 (without bio diesel). Diesel according to EN 590 (up to 7% bio diesel) can be used in above 0°C ambient with the following restrictions: Maximum storage time in high pressure cleaner diesel tank: 1 month. Diesel of more than 6 months old is not allowed to be used. Diesel EN 590 from an open container must not be used.
See fuel level (A) through window under the filling point.

E

Switching on the unit

OBS: The machine may be protected with antifreeze liquid from the factory¹⁾ - take care of point E8 below.

- E1. Connect the water supply.
- E2. Check if safety label has icon , then a back flow preventer is required.

- E3. Turn cable hook and pull off the cable.
 E4. Unwind hose and cable to full length before use.
 E5. Connect to power supply.
 E6. Switching on the cleaner. Cold water operation.
 E7. Set Fahrenheit /Celsius: (A) by on/off switch in cold mode and (B) toggle the temperature control to max¹⁾.
 E8. Release safety lock and ventilate the machine for air by activating the spray gun.
 If antifreeze is in machine – catch the first 5 liters of fluid discharge in a container for re-use.
 When the water flow is even, continue with the following steps.
 E9. Connect the spray lance to the spray gun.
 E10.a Cold water mode setting.
 Switch on the cleaner to .
 Flow regulation is adjusted at pump handle (A).
 E10.b Hot water mode (up to 100°C)
 Select temperature, ECO-mode setting for optimal standard cleaning.
 Switch on the cleaner to .
 Flow regulation is adjusted at pump handle (A).
 MH 3C, open side door by turning release knob (operating elements A20).
 E10.c Steam mode¹⁾ (over 100°C)
 Turn the flow regulation¹⁾ (A) completely right to end stop (OBS: max. 32 bar by temperatures over 100°C!).
 Select temperature above 100°C.
 Switch on the cleaner to .
 E11. Pressure regulation on FlexoPower or Tornado Lance¹⁾.
 E12.a Suction from internal detergent canister.
 Set the desired concentration of (A) or (B) cleaning agent at the dosing knob¹⁾.
 E12.b Suction from external detergent canister:
 Pull out the hose (B) from the chassis and connect to canister. Set the desired concentration of (B) cleaning agent at the dosing knob¹⁾.
 E12.c Suction from 25 L canister: (only for none hose reel version). Cut out the marked area with a knife to open the strapping points. Strap canister to the back of the machine. Pull out the hose (B) from the chassis and connect to canister.
 E13. Using cleaning agents: Set the desired concentration of (A) or (B) cleaning agent at the dosing knob¹⁾.
 Spray the object. Allow the cleaning agent to work, depending on the degree of soiling. Then rinse off with the high pressure spray jet. Never allow cleaning agent to dry out on the object as the surface may be damaged.

F**After using the unit or before leaving it unattended**

- F1. Switch to cold mode.
 F2. Run in cold mode to cool down product.
 F3. Switch off the cleaner. Turn the switch to position „OFF“.
 F4. Disconnect supply lines.
 F5. Close water tap.
 F6. Squeeze the spray gun to release pressure.
 F7. Lock the safety catch on the spray gun.

G**G1. Storing the cleaner below 0°C:**

Remove the water inlet hose from the cleaner. Remove the spray lance. Switch on the cleaner with the main switch in position “Cold Water”. Operate the spray gun. Gradually pour antifreeze (approx. 5 liters) into the water tank (C). The machine is protected against frost when antifreeze solution emerges from the spray gun. Lock the

safety catch on the spray gun. Switch off the cleaner. To avoid any risks, store the cleaner temporarily in a heated room before using it again. When the machine is put into service again, the antifreeze solution can be collected and stored for future use.

- G2. Tilt and unscrew the filter glass¹⁾ and empty it from water and fill it up with antifreeze and replace it on the cleaner again.

H**Maintenance & trouble shooting**

- H1.a Water inlet - Finger filter¹⁾: Unscrew quick coupling. Remove lock and filter and clean with water.
 H1.b Water inlet – Large filter¹⁾: Tilt glass outward, unscrew glass and clean with water.
 H2. Fuel filling filter: Filter can be removed by fingers and rinsed with clean fuel.
 H3. Fuel filter: Open side door for access (A). Open hose clips and replace the fuel filter (B). Observe applicable disposal regulations. Contact Nilfisk for sparepart filter.
 H4. Fuel Tank: Remove the drain plug and let the fuel pour into an empty container. Flush with clean fuel. Observe applicable disposal regulations.
 H5. Pump oil: Check the pump oil quality: Check colour of pump oil. If the oil has a dark grey or white shade, contact Nilfisk service!
 Top up cold pump with fresh oil to MAX if necessary.
 H6. Flame sensor¹⁾: Remove the sensor and clean with a soft cloth. Ensure that the sensor is correctly seated when installing again - the symbols must face upwards.

B6. Antiscaling adjustment

1. Open cabinet (A). Measure the water hardness or ask your water supply company.							2. Adjustment knob (B) setting according to rated water flow			
mg/l	Grains	°dH	°e	°f	ppm Ca	Description	9-15 L/min	16-20 L/min	21-26 L/min	27-33 L/min
.0-17	0-1	0-7	0-8,8	0-12,5	0-50	Soft	0	0	0	0
17-60	1,1-3,5					Slightly Hard	0,5	1	2	2
60-128	3,6-7,5	7-14	8,8-17,5	12,5-25,1	51-150	Moderately Hard	1	1,5	2,5	3
128-180	7,6-10,5	14-21	17,5-26,3	25,1-37,6	151-300	Hard	1,5	2	3	3,5
>180	>10,5	>21	>26,3	>37,6	>300	Very Hard	2	3	3,5	4

Indications on Display

Indication lights	Display ¹⁾	Cause	Remedy
Constant	0024	- The appliance is ready for operation. - At power on to cold mode, hour counter is shown for a few seconds.	
Flashing		- Water tap closed or water shortage. - Detergent tank empty. - Pressure regulation on the safety control blocks or the VarioPress ¹⁾ lance is set to low water volume. - Machine scaled.	- Check water supply. - Refill detergent or set Detergent knob to "0". - Change setting on safety control block / VarioPress to allow full water flow. - Nilfisk Service.
Flashing	FLO	- Machine has run for more than 120s without proper water supply. Machine shuts down to avoid pump overheating.	- Restart machine, if fault continues Nilfisk Service.
Constant	FUE	- Low fuel level. - Cold water operation possible.	- Check fuel level and refill, error reset after 5 sec.
Constant		- Low Nilfisk AntiStone level ¹⁾ . - Machine is still operational.	- Check Nilfisk AntiStone level and refill.
Constant Constant		- Service interval has expired. - Machine is still operational.	- Nilfisk Service.
Constant Flashing		- Service interval due in 20 hours. - Machine is still operational.	- Nilfisk Service.
Constant	HOS	- Boiler overheated. Exhaust sensor (EXT-H) has cut off fuel supply. - Machine scaled. - Boiler not serviced. - Cold water operation is possible.	- Nilfisk Service.
Constant Constant	LHE	- Flame sensor (B7) is sooted. - Ignition or fuel system failure. - Cold water operation is possible.	- Clean flame sensor (B7). - Nilfisk Service.
Flashing Flashing	LHL	- Boiler is over sooty and needs service. - Boiler is filled with diesel.	- Nilfisk Service.
Constant Constant	HOP	- Motor is overheated.	- Turn main switch to "OFF" position - let the machine cool down. - Remove/disconnect extension cable. - Possible phase failure. - Have electrical connection checked. - Nilfisk Service.
Constant Flashing	SEC	- Temperature sensor shorted.	- Nilfisk Service.
Flashing	SEO	- Temperature sensor is disconnected. - Cold water operation is possible.	
Constant Constant	FLF	- Flow sensor fault.	- Nilfisk Service.
Constant	POL	- Low pump oil. - MPU is leaking oil.	- Check oil lever and refill. - Nilfisk Service.

Other Faults

Indication lights	Cause	Remedy
 Not ON	- Plug not connected to the electrical plug socket.	- Put the plug into the electrical socket. - Check fuse.
Pressure too low	- High pressure nozzle worn out. - Pressure regulation set to low pressure or VarioPress-lance ¹⁾ set to low water volume ¹⁾ .	- Replace nozzle. - Turn the twist grip on safety control block clockwise (+) or set VarioPress-lance ¹⁾ to higher water volume (see chapter E10-11).
Machine is running with pulsating pressure and makes knocking noise	- Pump has drawn in air as the detergent tank is empty	- Close detergent valve. Remove lance from gun. Operate spray gun and let machine run until air in pump is gone and the machine is running normally again.
No detergent drawn in	- Detergent tank empty. - Dirt in detergent tank. - Suction valve at cleaning agent inlet soiled.	- Top up detergent tank. - Clean detergent tank. - Remove suction valve and clean or replace.
Burner soots up	- Fuel contamination. - Burner sooted or adjustment incorrect.	-  Nilfisk Service.

Maintenance plan

	Weekly	As required	When service lamp lights
Water filters		●	
Check and clean tank inlet fuel filter		●	
Check and replace Internal fuel filter		●	
Clean the fuel tank		●	
Grease quick coupling nipples for hose, gun and lance	●		
Check the pump oil quality	●		
Change the pump oil			 Nilfisk Service
