

All-In-One range

All-In-One vacuum cleaners: ready to be used,  
designed for your specific application

## All-In-One range

# Efficient yet simple

Simplicity is the main concept behind the All-In-One range. We are talking about the simplicity of selecting the right combination for your application. You can now choose between 5 different models built according to the main needs of 4 different segments and equipped with the best

accessory kit which enhances the efficiency of the vacuum cleaner making it the perfect solution.

Just plug and play... and continue with the task in hand.

## GENERAL CLEANING

### VHS120 General cleaning

The #General Cleaning vacuum cleaner is compact but powerful. It's equipped with the perfect accessory kit which includes the most commonly used tools. Using this industrial vacuum ensures a cleaner working environment in minutes.

## BUILDING & CONSTRUCTION

### VHS120 H-Class Building & Construction

The focus here is providing total safety. The #Building&Construction vacuum cleaner is a H Class vacuum to safely collect very fine material. It is equipped with the Longopac® system which is ideal for vacuuming and bagging material safely. The system enables the material to be collected directly in "endless" polythene bags, which can be closed and disposed of. This means that you can clean in total safety without coming into contact with debris.

## INDUSTRIAL KIT

## ANTISTATIC KIT

## BREWERY & DISTILLERY

### VHO200 Brewery & Distillery

In this sector, it's important to wash machinery and floors with high pressure washers. After which, the best way to keep the environment clean and dry is to use the Brewery and Distillery vacuum cleaner, specifically designed for the recovery of liquids. The model is equipped with an ejection kit for easy and fast disposal of the collected liquid. As the unit is built in stainless steel, this also enables the recovery of acidic liquids.

## METAL FOR SWARF COLLECTION

### VHS120 CC GV Metal – Swarf

The #Metal - Swarf vacuum cleaner is ideal when there is a requirement to clean machine tools and floors, and recover 60% metal chips 40% of oil. This model is equipped with a grid and valve for separating solids from liquids inside the container. The solid material deposits on the grill, whilst the liquids can be drained via the manual valve fitted to the bottom of the container. In this way the primary filter doesn't come in direct contact with incoming liquids or sharp objects.

## FOR LIQUID COLLECTION

### VHO200 Metal – Liquid

The #Metal - Liquid vacuum cleaner is ideal when the main requirement is to empty tanks, to recover 60% of liquids and 40% of metal chips. This model is equipped with an ejection kit, perfect for the expulsion of the collected liquid which is filtered from the solid waste and can be recycled into the machine tools.

#### FOOD INDUSTRY KIT

#### MACHINERY CLEANING KIT

#### OIL-PROOF KIT
