

IVC 60/30 Tact²

High productivity, high filtration, three phase compact industrial vacuum with Tact² automatic filter clean system for heavy duty dust extraction.

1 Wear-resistant side channel compressor

- A side channel blower delivers high suction power with a very long lifetime of at least 20,000 hours. These machines are therefore ideal for multiple shift operation.

3 Waste container with set-down mechanism

- The waste container with set-down mechanism ensures ergonomic emptying, even when the vacuumed waste is heavy.

2 Automatic Filter Cleaning System Tact²

- The two filters are cleaned with targeted, powerful blasts of air. The procedure is triggered automatically, the suction power remains constantly high, and the work can be continued without interruption.
- Filter designed to allow uninterrupted use with consistently high suction power.

4 With compact flat pleated filter

- The compact flat pleated filter allows a large filter area with a small and clear design.

IVC 60/30 Tact²

- Antistatic equipment
- Liquid cut-off
- Integrated pre-separation cyclone
